

User Stories [ordered by priority]		To Do	In Progress	Done		
As a user, I want all the pages to be easy on the eyes and intuitive to access.	Divide the page structure into navbar, display area, and footer.	Make a functional and good looking navbar.	Make user info area in display area to be good looking and user friendly.			
	Make recent match analyze in display area to display something related to their recent games.	Make a functional and good looking footer.				
As a player, I want to have a visual indicator about my recent game status (change of winRate overtime), so that I can know if I am doing better or worse	Create a graph of the winrate overtime.	Store recent match history in the database				
	Set up/return match data					
As a user, I want the basic features of the websites to be stable.	Add integration test					
	write unit test to things that can be unit tested					
As a player, I would like my aggregate KDA to be computed and visualized.	Decide the weights of factors in KDA computation					
	Make the KDA computation and show on the page
