User Stories [ordered by priority]

User Stories [ordered by priority]	Story Points
Sprint 1	
As a user, I want a well-designed website that is accessible and genre competitive.	5
As a user, I want the app has a functionality that can save user data, so that data will be automatically displayed after user login	5
As a player, I want to be able to check summoner information of mine and others easily from the app, so that I don't have to login to my League client to do so.	5
Sprint 2	
As a user, I want all the pages to be easy on the eyes and intuititve to access.	8
As a player, I want to have a visual indicator about my recent game status (change of winRate overtime), so that I can know if I am doing better or worse	5
As a user, I want the basic features of the websites to be stable.	5
As a player, I would like my aggregate KDA to be computed and visualized.	2
Sprint 3	
As a player, I want to see my match history so that I can know how I perfrom recently.	12
As a player, I would like to be able to see a leaderboard of current top ranked player.	8
As a player, I want to have a good looking Landing page so that I can get comfortable first impression.	5
As a Player, I want an application that is tested in every aspect so that I don't have to worry about it crashing.	5
Sprint 4	
As a user, I want to be able to know if the player I am searching is available in the selected region or not.	4
As a user, I want to have a good visual and functional experience using the Web application	8
As a product Owner, I want to see a functional demo that is presentable and well tested	8
As a product owner, I want to have a general documentation of the application so that it can be maintainable	2
